Viral Patel

Boston, MA | (857)-800-3362 patel.viral@northeastern.edu https://www.linkedin.com/in/patelviralb/ https://patelviralb.github.io/ https://trailblazer.me/id/patelviralb/

EDUCATION

• Northeastern University - Boston, MA

Master of Science – Computer Science

• University of Mumbai - Mumbai, India

Bachelor of Engineering - Computer Engineering

September 2019 – Present

GPA: 3.75

August 2011 - July 2014

EXPERIENCE

• Software Engineer Co-op

Quick Base

 $\mathbf{June} \ \mathbf{2020} - \overline{\mathbf{Present}}$

• Enhancing UI of timeline report (Gantt Chart) used to visualize various reports by customers of Quick Base (Low code/No code) platform using **React.js**, **Redux** improving user interaction and usability by **80**%

• Implemented product's back-end API to retrieve data for reports using C++

• Khoury Systems Lab Admin

Khoury College of Computer Sciences

January 2020 - May 2020

Boston, MA

Boston, MA

• Provided technical support to staff/students and monitored lab equipment keeping them at 100% efficiency

• Created and managed work schedules for the lab proctors

• DRC Note-taker

September 2019 - December 2019

Northeastern University

Boston, MA

 Compiled notes for University Learning Disabilities Program for students whose primary disability is a learning disability and/or attention deficit disorder

• Senior Software Engineer

November 2018 – August 2019

Prolifics

 $Pune,\ India$

 \circ Consulted and designed solution to help providers track and submit processed Medicare claims improving claim processing time by 70%

• Technology Analyst

July 2014 – November 2018

Infosys Limited

Pune, India

 Consulted and designed solution for Health Insurance Company while automating claim status inquiry processes using Java, Shell Scripting, C and IBM MQ message system improving turn around time by 90% while mentoring team of 3 freshers

TECHNICAL SKILLS

- Languages: Java, C++, C, Python, Shell Scripting
- Web Technologies: React.js, Redux, Node.js, JavaScript, RESTful Webservices, HTML, CSS, Bootstrap
- Database: MySQL, MongoDB, Oracle, MS-SQL
- Tools: Git, JIRA, IntelliJ, VSCode, Postman, IBM WTX, ITX

Projects

• Opportunity Hack 2020 | React, React Hooks

Designed web based sample UI to visualize the AI based model to filter mentors based on mentee preferences. Solution won 4^{th} place in the hackathon out of 13 teams and 39 hackers

• Chat Application | Java, sockets, Hibernate, JavaScript, HTML, CSS

Created chat application following design patterns, SOLID principles and agile methodology which helped in understanding of team project dynamics

• Personal Assistant Action Classifier | Python, Keras, scikit-learn, pandas
Implemented classification algorithm to infer actions to be taken by virtual assistant from input sentences

• Service Ticket Distributor | R, Design Thinking, Machine Learning Algorithms

Built proof of concept as a side project to automate ServiceNow ticket distribution among teams improving team efficiency by 30%
